

TEKO

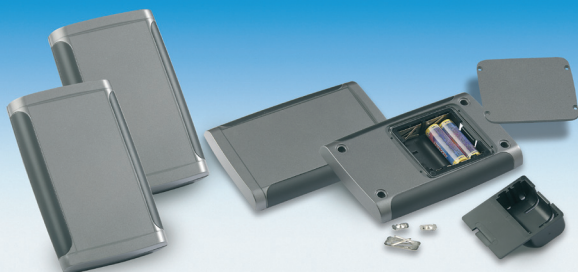

TEKMAG

Innovative metal enclosures moulded in TEKNIUM, that will convince you thanks to the ultra-light weight, the absolute strength, and the shielding properties of TEK MAG. The side profiles have a special soft-feel surface to assure a secure grip. All models have a recessed area suitable for keypad membrane or a display, and they are equipped with IP65 sealing kits. Versions with battery compartment for 2x AA / 1x 9V batteries or 4x AA / 2x 9V are available.

Three models available in one double colour version: metallised dark gray body with black soft side profiles.

Applications: Automotive, Avionics, Medical Technology, Industrial Automation, Telecommunications.

Teko Workshop offers:

- CNC machining
- Custom keypad membranes
- Special surface finishing
- Digital printing
- Laser marking
